- Github Notes

- You can't delete the entire repo, **elijah**. Stop worrying.
 - Even if you can delete everything, there's history. That's why it's called version control.
 - *Just don't edit history*
 - *But we probably don't have those perms anyways.*
- Stage changes in VSC cuz its easiest
 - Or use git add
- go to directory in cmd
 - cd, dir
- git status // see changes
- git pull // get latest changes
- git commit -m "Commit Message" // sets a commit message
- git push // pushes to master branch of repo
